Impact of Covid-19: Needs assessment

A Rapid Needs Assessment of Excluded People in England During the 2020 COVID-19 Pandemic
MAY 2020

Doctors of the World's Rapid Needs Assessment revealed that **migrants** are:

- at **increased risk** of being exposed to COVID-19
- more likely to have **poorly managed chronic health** problems;
- **less likely to access timely healthcare** if they become unwell with COVID-19;
- **less able to self-isolate** and protect themselves and others from further transmission, due to overcrowding.

destitution
homelessness

Impact of Covid-19: Asylum accommodation

"An asylum seeker had begun to experience severe stomach pain, but there was no action by staff members for 24 hours. Once taken to hospital, offered a surgery but he refused because he wouldn't take care of himself in the recovery stage when sent to barracks"

overcrowding

Inadequate healthcare outbreaks

Lessons Learned: the NGO perspective

- Collect robust and consistent data
 - Needs assessment / scoping exercise
- Constantly find gaps & address them
 - Closed door advocacy / campaign
 - Accessible information policy development
 - Improved GP registration
 - Data sharing reassurance
 - Asylum Seeker Health Steering Group
- Invest and build capacity for coproduction
 - Tailored response to the syndemic
 - Community links
